

SALAH ABU FARHA

Full Stack Developer | Software Engineer | AI Engineer

salahabufarha1996@outlook.com | +962-796089296 | Amman, Jordan | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [HuggingFace](#)

PROFESSIONAL SUMMARY

Full Stack Developer transitioning into AI Engineering, with 3+ years building secure, scalable web and mobile applications using Java Spring Boot, NET (C#), the MERN stack, and React Native. Skilled in frontend technologies such as React, Next.js, and TypeScript, and experienced backend systems including Node.js, Spring Boot, ASP.NET, MongoDB, and MySQL. Growing expertise in Generative AI and agentic systems, including LLM-powered applications, RAG pipelines, and multi-agent workflows built with LangChain, LangGraph, and the Anthropic API, backed by Google, OpenAI, and Anthropic AI certifications. Proficient in DevOps practices including Docker, Kubernetes, and CI/CD pipelines to ensure smooth, reliable software delivery across environments.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Tailwind CSS
Mobile	React Native, Expo
Backend	Java, Spring Boot, C#, ASP.NET, Node.js, Express.js, RESTful APIs, JWT, Spring Security
Data Science & AI	Python, FastAPI, Pandas, NumPy, Matplotlib, PyTorch, LangChain, LangGraph, MCP
DevOps	Docker, CI/CD, Jenkins, Kubernetes
Database	MySQL, MongoDB, JPA/Hibernate
Tools	Git, GitHub, Maven, Postman
Concepts	Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

Full Stack Developer | AI Engineer – Freelance Projects

Jun 2023 – Present

- Developed full-stack web and mobile applications using React, Next.js, TypeScript, React Native, FastAPI, and .NET, delivering secure and scalable solutions.
- Designed RESTful APIs with JWT authentication, role-based access control, and secure backend architectures.
- Built responsive and high-performance user interfaces using React, Next.js, and Tailwind CSS.
- Developed AI-powered applications using Machine Learning, Deep Learning, Generative AI, and LLM technologies.
- Built Computer Vision, NLP, and RAG solutions using PyTorch, Hugging Face Transformers, LangChain, LangGraph, and vector databases.
- Created intelligent agents, chatbots, and knowledge-based systems powered by Large Language Models (LLMs).
- Implemented data processing and machine learning pipelines using Python, NumPy, pandas, and scikit-learn.
- Deployed scalable applications using Docker, CI/CD pipelines, AWS, Render, and Vercel with MySQL and MongoDB databases.

PROJECTS

AgentFlow – AI Agent Platform with RAG and LangGraph

[GitHub Code](#)

Tech: Python, FastAPI, LangGraph, LangChain, Ollama, ChromaDB, MySQL

- Built an AI agent platform with RAG, LangGraph, ChromaDB, and Ollama for context-aware AI conversations and document retrieval.

FoodVision Mini – Food Image Classification App

[Hugging Face](#)

Tech: Python, PyTorch, Vision Transformer (ViT), Torchvision, Gradio, Hugging Face Spaces

- Developed a PyTorch-based Vision Transformer (ViT) image classifier for food recognition and deployed it with Gradio on Hugging Face Spaces for real-time inference.

FoodVision Big – AI Food Analysis System

[Hugging Face](#)

Tech: Python, PyTorch, Vision Transformer (ViT), Torchvision, Gradio, Hugging Face Spaces

- Built an AI food analysis system using PyTorch and Vision Transformer (ViT) to identify 101 food categories with real-time image prediction through Gradio.

Restaurant – Interactive Restaurant Ordering App

[GitHub Code](#)

Tech: Java, Spring Boot, Spring Security, SQL, Hibernate, Next.js

- Built an ordering system with real-time status tracking, improving user engagement by 15%.

Elite Mobile – E-Commerce & Delivery System

[GitHub Code](#)

Tech: React Native, NestJS, MySQL

- Built a mobile store application for browsing products (shoes, electronics, and accessories), placing orders, and tracking delivery.

The World Wise – Travel & Activity Tracker

[GitHub Code](#)

Tech: C#, ASP.NET, SQL, Next.js

- Built a platform for logging travel destinations and tracking running/cycling workouts with map-based location selection and activity details.

NATOURS – Tour Management Platform

[GitHub Code](#)

Tech: MERN Stack (MongoDB, Express, React, Node.js), TypeScript

- Created a tour booking platform with JWT authentication, supporting 100+ concurrent users.

Quick Dish Mobile – Food Ordering Application

[GitHub Code](#)

Tech: C#, ASP.NET, SQL, React Native, Expo

- Developed a secure backend enabling users to browse menus, place and track orders, and manage accounts with authentication and authorization features

Book Nest Mobile – Cabin Reservation Platform

[GitHub Code](#)

Tech: C#, ASP.NET, SQL, React Native, Expo

- Built a complete cabin reservation platform featuring booking management, authentication, and role-based access, allowing users to reserve, manage, and track stays seamlessly.

Additional projects available on [GitHub](#) and [HuggingFace](#).

EDUCATION

Balqa Applied University
Bachelor's in Accounting - FinTech

2015 – 2018

LICENSES & CERTIFICATIONS

Udemy	Java Masterclass 2025: 130+ Hours of Expert Lessons — View Credential
	The Ultimate React Course 2024: React, Next.js, Redux & More — View Credential
	Node.js, Express, MongoDB & More: The Complete Bootcamp — View Credential
	Build Responsive Real-World Websites with HTML and CSS — View Credential
	LangChain – Agentic AI Engineering with LangChain & LangGraph — View Credential
